EXHIBIT B

Egg+Beads

The image displays a large rectangular area filled with a light, grainy background. Scattered throughout this area are numerous dark, irregular spots and smudges of varying sizes. Some spots are small and distinct, while others are larger and more diffuse, resembling ink splatters or biological growth. The distribution is somewhat random, with a slight concentration of larger smudges towards the right side of the frame. The overall appearance is that of a microscopic view or a forensic sample analysis.

EXHIBIT D

E-coli 0157:H7

A black and white micrograph showing numerous rod-shaped bacteria, identified as E-coli 0157:H7. The bacteria are scattered across the field of view, with some appearing as individual cells and others in small clusters. A prominent, larger, and more complex structure is visible in the center-left area, possibly representing a cell in a different stage or a cluster. The background is light and grainy.
